

# Guillermo Accame

**Director of Risk Management ▪ Panattoni Development Company, Inc.**

**Industry Liaison ▪ Earth System Science Interdisciplinary Center, University of Maryland**

Mr. Accame manages insurance, contractual, and environmental risk throughout Panattoni's operations. He advises the company's Investment Committees and serves as the chair of the Sustainability Committee. Panattoni is the largest privately owned logistics development company in the United States, and also operates throughout Europe and Canada.

Mr. Accame also serves as the Industry Liaison for the University of Maryland's Earth System Science Interdisciplinary Center (ESSIC). He currently chairs an Industry Advisory Panel conducting a Climate Applications Test-Bed, a joint pilot project between ESSIC, NOAA, and private industry. He represented private industry at NOAA's Climate Prediction Center's strategic planning meeting for 2013-2017 and Climate Program Office strategic planning meeting for 2014-2018. Recently, he presented evidence to The Royal Society (UK) in support of its Human Resilience to Climate Change and Disasters project, and was invited to the White House to assist in the launch of President Obama's new Climate Data Initiative.

Prior to joining Panattoni, Mr. Accame worked as an environmental consultant for over 20 years managing hazardous materials compliance, due diligence, Brownfield redevelopment, and natural resource assessment and inventory projects. Prior to working as an environmental consultant, Mr. Accame conducted diamond exploration for various diamond companies, including Harry Winston.

Mr. Accame received a Bachelor's degree in Geology from the University of Maryland, where he was recognized as a distinguished alumnus, and a Master's degree in Geochemistry and Remote Sensing from Purdue University, where he served as a research fellow with the U.S. Bureau of Mines, Office of Surface Mining, and IMMRRRI.
