

Olivier Boucher

Olivier Boucher is a CNRS research director at the Laboratoire de météorologie dynamique (Université Pierre et Marie Curie, Paris). His research interests include aerosol-radiation-cloud interactions, monitoring of atmospheric aerosols, Earth System modelling, biogeochemical feedbacks, climate effects of aviation, and geo-engineering among other things. Olivier is coordinating the aerosol sub-project of the Monitoring Atmospheric Composition and Climate (MACC) European projects which are building towards the Copernicus atmospheric service. Olivier was also a coordinator lead author for the “Clouds and Aerosols” chapter of the IPCC fifth assessment report.
